ACOUSTIC ABSORBERS

ACOUSTIC ISLANDS ACUSTIART

Elements for the construction of absorbent volumetric surfaces as baffles, islands or acoustic clouds. Infinite possibilities.

ADVANTAGE

Improve the absorbent response and reverberation times for all kinds of rooms where standard solutions are not possible. Easy installation. Innovative design.

APPLICATIONS

Multipurpose rooms, offices, studios, radio stations, studios, homecinema, TV sets, cinemas, theaters, rehearsals, shops, department stores, museums, exhibition halls, hotels, hospitals, outpatient clinics, gyms, etc.

Acustiart

50 or 100 mm. thickness

Acustiart-S

Custom shapes

Acustiart-C

Circular panels

Acustiart Digital

Digital print

Acustiart-L

With built-in light

Acustiart-3DM

For standard profiles

Acustiart Duo

Acoustic screen

Acustiart Totem

Absorbent column

Acustiart Cube

Small & Large

Finished

24 colors fabrics

Acustec-N

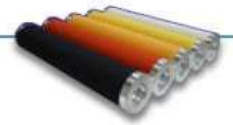

Absorbent ceiling RAL color finished

Acustibaf-C

High absorption acoustic cylinders

Acoustic Screen MA-50

Division of spaces with high absorption

Acustideco

Acoustic decorative panels for walls

Acustison-50A

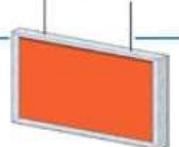

Multi-perforated metal absorbent panel

Acustibaf-N40

Acoustic baffles suspended from the ceiling

Dampers-Resonators

Correction of sound in acoustic rooms

BassTrap

Low frequency control

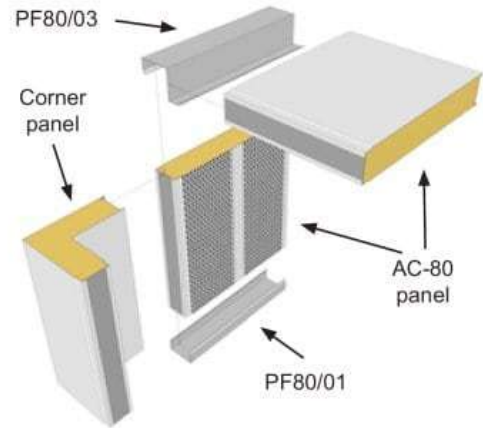

ACOUSTIC PANELS

PRESENTATION

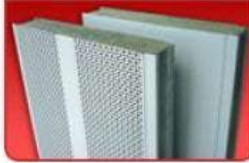

Acustimodul 80 panels range are used for the installation of acoustic cabins, booth and barriers for the soundproofing of all kind of machinery.

APPLICATIONS

Indoor and outdoor barriers, acoustic booths, control and rest rooms, acoustic barriers for air conditioning units and industry in general. Acoustic barriers or screens for industrial and commercial refrigeration.

Acustimodul-80A

Self-supporting panel. Modular system

Acustimodul-80RA

Self-supporting reinforced insulation panel

Outdoor enclosures

Indoor cabins

Acoustic barriers

INSULATING MATERIALS

Acustilastic-N

Floating floors. Inertia bases

Acustisol

Floating floors to insulate vibration

Greenglue

Viscoelastic insulation in tube format, to be placed between laminated gypsum boards

LAT5

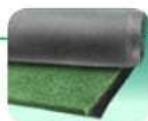

Insulating and Damping Acoustic Sheet

PKB-2

Insulation multi-layer material

PKB-2F

Line ducts

ACOUSTIC METAL DOORS

OFFICIAL CERTIFICATES

The acoustic doors of **Acústica Integral** have successfully passed the tests to obtain the certificates of acoustic insulation and resistance to fire by official laboratories of recognized prestige.

OWN MANUFACTURING

The manufacture of an acoustic door is carried out using the most modern systems to ensure throughout the process the fulfillment of the most stringent requirements and the final quality of the finished product. Wide range of standard models with possibility to incorporate special accessories on request.

RS-PRO

51 to 54 dB

Professional

Models	Rw
RS10	54 dB

ACOUSTIC SILENCERS

SNA

Rectangular silencers

Silenbox

Venting and air conditioning ducts

SNC y SNN

Cylindrical silencers with and without nucleus

Reactive Silencers

Rotary compressors, generator sets, 2 and 4 stroke engines

With more than 20 years of experience, we are the leading group in the acoustic sector composed of companies that complement their activities to offer a comprehensive service.

Export to more than 25 countries.

ACÚSTICA INTEGRAL

Manufacture, Design, Marketing and Installation of acoustic materials, systems of soundproofing and acoustic conditioning.

DECIBEL INGENIEROS

Acoustic engineering services. Maps of noise, environmental and industrial impact, studies of acoustic conditioning and isolation, certifications, etc.

Own manufacture

I + D Technical Projects Office

Official Laboratories Certificates

Professional Noise Solutions

3 product manufacturing lines to give solution to all noise problems. We have specific webs of each one of them, with all the information "online" clearly and fully presented.
